

We have made some changes to our L & D procedures for the safety of our patients and staff.

When EMS presents to the Ambulance Entrance with a patient for L&D, our officer will screen them, provide them with a mask if necessary and then call the unit to advise them that the patient is on the way up.

EMS personnel should wait on 2, just off the pink elevators for L and D staff to greet them and escort them in.

Please inform all EMS personnel to not enter the Labor and Delivery unit without being escorted by HMC staff. Additional screening by L and D staff will occur prior to entering the unit. Separate Covid rooms for L and D have been created. We want to ensure the proper rooms and proper routes are being used.

If anyone has any questions, they can contact me directly.

Thank you and stay safe.

~Matt
